

Berg Utbildarna AB

Rock- Blasting- and Mining Technique

Training for competence

Competence and experience

BergUtbildarna AB, a leading company in Sweden for training in modern drilling and blasting technique. The company have more than 30 years experience in this field.

Michael Hermansson, President of the company, has during the years been in close collaboration with many important contractor, mining, drilling and explosive companies.

BergUtbildarna AB takes part in a great number of training activities in Sweden: training for Blasting Foreman licenses, training for Blasting Supervisors, training for licenses for Transport of Dangerous Goods, training for licenses for Explosive Store keepers, training for Driller licenses.

Philosophy and structure

The company offer both theoretical and practical training and the most important factor in all training is: code of good practice - safety.

To optimize training you must start the project with an analyze of technique, routines and equipment used today and from that form the training programme. The training ends with a follow up of the practical result out on the work site. This give the possibility to reach our goal, competence.

Competence is not just to have knowledge, but also to understand how to use it to optimize the production.

Consulting services

Specialities and projects

BergUtbildarna AB also has very long experience from consulting activities in the field of mining design, cautious blasting in built up areas, optimizing of fragmentation in quarry blasting plans for bench-, trench- and tunnel blasting etc.

BergUtbildarna AB have been involved in many large mining and construction activities for example in the LKAB Kiruna mine in northern Sweden, the big railway project Botnia banan along the Swedish northern coast, several tunnel projects as Norra Länken and Södra Länken in Stockholm, the Trollhättan tunnel and the Strömstad tunnel in western Sweden among others.

Cautious blasting with optimizing the blasts and minimizing the vibrations is our speciality.

The founder, consultants and clients

BergUtbildarna AB has been working with projects for several Swedish contractors as Skanska, NCC, Peab, BeMo. Lemminkäinen, mining companies as LKAB and Boliden, and important clients as the Swedish Road authorities and the Swedish Railway authorities but also for the Swedish Board for Occupational Safety and Health to analyze risks for rock building projects and to get the Code of good practice.

The founder and the owner of the company, Michael Hermansson, Mining Engineer, M Sc, is also senior consultant in blasting together with Mats Olsson, Mining Engineer, M Sc. Responsible for Mining design projects is Hans Thorshag, Mining Engineer, M Sc.
